```java
package com.ameya.daos.util;

import java.sql.ResultSet;
import java.sql.SQLException;

import org.springframework.jdbc.core.RowMapper;
import com.ameya.models.Topic;

public class TopicRowMapper implements RowMapper<Topic> {

    @Override
    public Topic mapRow(ResultSet rs, int rowNum) throws SQLException {
        Topic topic=new Topic();
        topic.setId(rs.getInt("id"));
        topic.setTopicName(rs.getString("topicname"));
        topic.setTopicDesc(rs.getString("topicdesc"));
        return topic;
    }

}
```
